JOHN J. ZIMMATORE JR. AD4ZH

"I bet you don't get many deer at the W4BTI Field Day site and with refreshments like these, you won't get many more!" Hey, you can't please everyone. At least "Buck" was able to make some contacts on HF while Robert Harris, KF40EG, chased stations on packet. (Buck didn't eat much; he was already "stuffed.") The Kennehoochee Amateur Radio Club operated from the Wildlife Action Center at Lake Alatoona, Georgia.

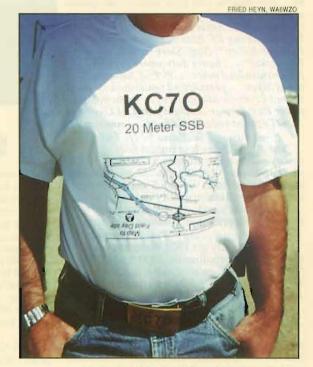

A vintage Field Day—Paul Corson, WA3VJB, used a 1950 Collins 32V2 AM transmitter and a 1962 Stewart-Warner R390A receiver to experience Field Day as it was almost 40 years ago.

FIELD DAY '97

Field Day offers terrific opportunities to showcase Amateur Radio to the public. The Kings County (New York) Repeater Association did just that with their WA2ZWP operation at the Fort Hamilton Army Base. Who could pass up a chance to send a free greeting via ham radio?

FIELD DAY '97

Lost? Just look down!—Allen Wolff, KC7O, didn't lose his way to the Pasadena Radio Club (W6KA) Field Day site. With the map upside down on his T-shirt, how could he miss?

"Okay, now turn to a heading of 270°."—There has to be a better way to aim Field Day satellite antennas! Actually, members of the TRW Amateur Radio Club (W6TRW) were just assembling their OSCAR station in Friendship Park in San Pedro, California prior to the start of the big event.
